

EDUCATIONAL TOUR TO HESCO(2016-17)

On 6th September 2016, Him Jyoti School organised an educational tour to the Himalayan Environmental Studies and Conservation Organisation (HESCO) for classes XI and XII. HESCO takes initiative to improve the wild habitat and to mitigate human wildlife conflict through science and technology. The main focus is on agriculture, horticulture and energy conservation. The students saw watermills, technology parks, organic farms, rain water harvesting system, food parks, biomass system, solar cookers and water heaters. They visited the Isotope Hydrology Centre established by Bhabha Atomic Research Centre, Mumbai. The walk around the whole campus, was indeed thrilling, especially the workshop conducted by Mr. Anurag, which was interactive as well as informative.

This tour was undoubtedly, an eye opener and an answer to many questions of inquisitive young minds. The students were able to see practical demonstrations of many experiments and phenomenon, they had read about in their books.

Such educational trips help the students to develop scientific aptitude to pursue research in their chosen field of interest.
